ABOUT ME

I am a Software Engineer at Wincom with hands-on experience in ASP.NET, C#, and DevExpress for enterprise application development, as well as Laravel, Flutter, and Python automation for web and mobile solutions. I have worked on projects ranging from clinic subscription management systems and workflow automation tools to data visualization dashboards and computer vision applications. With a strong foundation in both backend and frontend technologies, I strive to deliver scalable, efficient, and user-centered solutions while continuously expanding my technical expertise.

EDUCATION

Diploma in Information Technology

Southern University College

CGPA: 3.58

2023 - 2025

DEAN LIST in Sem 5 & 6

Gold Awards in INIIC

Gold Awards in Virtual Innovation

Competition

Major in Accounting and Economics

SMK Taman Univeristi

1A+ 4A 3B 1C

2017 - 2022

SKILLS

Laravel Framework

Python

Flutter Framework

Java

C#

ASP.NET

LANGUAGE

- Chinese
- English
- Malay

Technical Engineer

Kunzz Holdings | 25 Jalan Tanjong 3, Taman Desa Cermelang

- Assisted in migrating web pages from PHP to React, ensuring functionality and usability during the transition.
- Learned and integrated APIs to support system functionality and improve application performance.
- Quickly adapted to new technologies and development tools, including Vibe Coding, demonstrating strong learning agility.
- Collaborated with team members to troubleshoot technical issues and deliver project requirements on time.

Software Engineer

Wincom | Taman Impain Emas 67, Jalan Pulai 21

- Developed and maintained backend solutions using C# ASP.NET
- Designed and implemented inquiry pages (.aspx) with ASP.NET
- Created and customized reports using DevExpress
- Wrote and optimized SQL queries for reporting and data analysis
- Utilized Visual Studio and SSMS for development and database management
- Conducted debugging and troubleshooting to improve system stability
- Strengthened expertise in ASP.NET backend development and SQL programming

Software Developer Intern

GPIS Solution | Taman Pulai Utama 67, Jalan Pulai 21

- Developed web scraping tools and automation scripts using Python (Selenium, Pandas)
- Built a clinic subscription management system with Laravel (CRUD, authentication, SQL integration)
- Designed and developed a mobile app using Flutter connected to a Laravel backend
- Applied data visualization techniques and built a hand tracking calculator using MediaPipe and OpenCV
- Strengthened skills in full-stack development, problem-solving, and team collaboration
